Molecular and Cellular Biochemistry:

An International Journal for Chemical Biology in Health and Disease

CONTENTS VOLUME 180, Nos. 1 & 2, March 1998

CARDIAC METABOLISM IN HEALTH AND DISEASE
S. Abdel-aleem and J.E. Lowe, guest editors

Preface 1

L.M. King and L.H. Opie: Glucose and glycogen utilisation in myocardial ischemia – Changes in metabolism and consequences for the myocyte 3–26

E.A. Park and G.A. Cook: Differential regulation in the heart of mitochondrial carnitine palmitoyltransferase-I muscle and liver isoforms 27–32

D.J. Paulson: Carnitine deficiency-induced cardiomyopathy 33–41

F.G. Schaap, G.J. van der Vusse and J.F.C. Glatz: Fatty acid-binding proteins in the heart 43–51

B. Rodrigues, M.C. Cam and J.H. McNeill: Metabolic disturbances in diabetic cardiomyopathy 53–57

M.A. Mahgoub and A.-S.A. Abd-Elfattah: Diabetes mellitus and cardiac function 59–64

L.J. De Windt, R.S. Reneman, G.J. Van der Vusse and M. Van Bilsen: Phospholipase A_2-mediated hydrolysis of cardiac phospholipids: The use of molecular and transgenic techniques 65–73

T.A. Hacker, B. Renstrom, S.H. Nellis and A.J. Liedtke: The role of glucose metabolism in a pig heart model of short-term hibernation 75–83

J.R.B. Dyck and G.D. Lopaschuk: Glucose metabolism, H^+ production and Na^+/H^+-exchanger mRNA levels in ischemic hearts from diabetic rats 85–93

S. Abdel-aleem, J. St. Louis, S.C. Hendrickson, H.M. El-Shewy, K. El-Dawy, D.A. Taylor and J.E. Lowe: Regulation of carbohydrate and fatty acid utilization by L-carnitine during cardiac development and hypoxia 95–103

A.-S.A. Abd-Elfattah, J. Hoehner and A.S. Wechsler: Identification of nucleoside transport binding sites in the human myocardium 105–110

P.S. Bora, D.D. Miller and B.R. Chaitman: Mutagenesis and characterization of specific residues in fatty acid ethyl ester synthase: A gene for alcohol-induced cardiomyopathy 111–115

B. Christian, E. A.-T. Zainab, M. Mireille and M. Josef: Palmitate oxidation by the mitochondria from volume-overloaded rat hearts 117–128

S. Abdel-aleem, M.K. El Awadi, W.A. Zarouk, D. Taylor and J.E. Lowe: Effects of phosphodiesterase inhibitors on glucose utilization in isolated cardiac myocytes 129–135

R.T. Smolenski, J. Jayakumar, A.-M.L. Seymour and M.H. Yacoub: Energy metabolism and mechanical recovery after cardioplegia in moderately hypertrophied rats 137–143

A.-S.A. Abd-Elfattah, R.P. Maddox, M.E. Jessen, I.M. Rebeyka and A.S. Wechsler: Role of nucleoside transport and purine release in a rabbit model of myocardial stunning 145–151

T. Doenst, P.H. Guthrie and H. Taegtmeyer: Ischemic preconditioning in rat heart: No correlation between glycogen content and return of function 153–161

D. Wang, Y. Xia, L.M. Buja and J.B. McMillin: The liver isoform of carnitine palmitoyltransferase I is activated in neonatal rat cardiac myocytes by hypoxia 163–170

R.C. Starling, D.F. Hammer and R.A. Altschuld: Human myocardial ATP content and *in vivo* contractile function 171–177

A.-S.A. Abd-Elfattah, M.E. Jessen, J. Lekven and A.S. Wechsler: Differential cardioprotection with selective inhibitors of adenosine metabolism and transport: Role of purine release in ischemic and reperfusion injury 179–191

K.K. Kalsi, R.T. Smolenski and M.H. Yacoub: Effects of nucleoside transport inhibitors and adenine/ribose supply on ATP concentration and adenosine production in cardiac myocytes 193–199
